Scan on the show floor

XTRAX Scan is an integral part of **XTRAX Tracker**, Winthrop Technologies' Exhibit Property Management Software System.

XTRAX Scan uses Symbol Technologies Palm-based bar code scanners coupled with custom software to provide the simplest and easiest way to accurately record the shipment and receipt of exhibit properties.

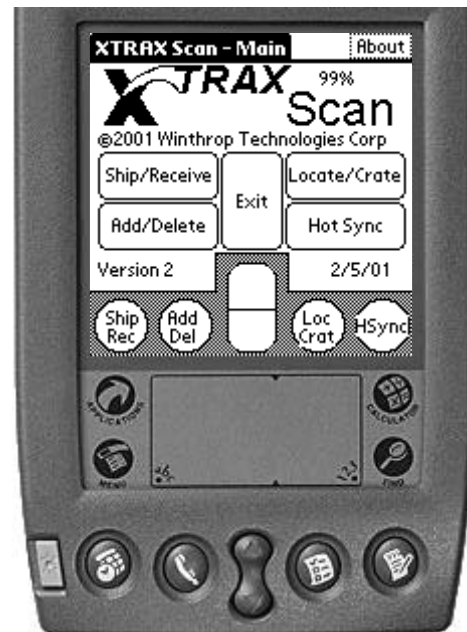

- **Scan** uses HotSync® technology -- uploading and downloading is completely controlled by **XTRAX**
- **Scan** is easy-to-use and has an intuitive user interface controlled via touch screen and/or built-in buttons
- **Scan** displays crating and allows review and/or deletion of scans
- **Scan** manages multiple concurrent shipments and/or receipts
- **Scan** handles recrating, uncrating and relocating
- **Scan** checks that all items to be shipped or received have been scanned
- **Scan** allows the operator to indicate damage on returning items

The SPT1800 is Symbol's rugged Palm-based bar code scanner. Designed for use in rough environments, the SPT1800 can withstand a drop from 5 feet onto concrete.

A rechargeable lithium ion battery powers the scanner. The unit includes a HotSync® recharging cable or a HotSync® recharging cradle. It is equipped with 8M of memory, enough for thousands of scans. The HotSync® cable or cradle attaches via serial port or USB port and serial adapter cable
