

Product Description

What is it?

XTRAX on the Web is the Internet version of **XTRAX**.

How does it work?

Any PC or Macintosh computer can access the power of **XTRAX** by connecting to an **XTRAX on the WEB** server via the Internet. The **XTRAX** bar code scanner also connects to the server via the Internet (through a workstation). Using Microsoft's terminal server technology, **XTRAX** is available anytime and anywhere, even the show floor.

What are the benefits?

- No hardware investment other than bar code scanner(s) and bar code printer(s)
- No software investment — all software is included
- No IT or database personnel required — all software setup and support is included
- Fees are usage-based — initial fees are very low, the organization can “grow” into it
- All programming and data is compatible with **XTRAX** — start with **XTRAX on the WEB** and later convert to **XTRAX**
- **XTRAX on the WEB** is based on **XTRAX Tracker SQL** and supports multiple warehousing sites

What are the System Requirements?

- Internet access
- PC with Internet Explorer and ActiveX execution enabled (RDC software optional)
- Macintosh with RDC software
- Ports 3389 and 9393 open on firewall

What included?

- Shared server with access for 2 users (no additional users can be added — upgrade to dedicated server)
- Dedicated server with access for 4 users (additional users can be added in increments of 5)
- Server software support — backups, updates, security patches
- Application updates
- Technical support
